European Credits	1 week internship equal 1 ECTS 1 semester: 30 ECTS ECTS can be adapted to your sending institution's norms.

Compulsory Vaccines

Guidelines from the French Department of Health, related to internships in physiotherapy, are as follows:

Besides vaccination against Diphtheria, Tetanus and Poliomyelitis (unique injection DTPolio), students must be immunized against Tuberculosis. Concerning this disease, students must have received an intradermal tuberculin test (recently performed). The result of this test must be communicated to the Vichy IFMK's International Department.

In addition to that, students must be vaccinated against **HEPATITIS B**. The

vaccination guidelines are as follows:

- First injection of the vaccine at least four months before the beginning of the internship.
- Second injection, one month later.
- Third injection, one month later again.
- A checking serology one month again.
- The result of this checking serology must be communicated to the Vichy IFMK's International Department.

Therefore, a total time of a minimum of 4 months.

We raise awareness on the fact that without the checking serology result or if this result is negative, i.e. lower than 10 UI/l, the student could not perform the internship intended.

Attached documents

- **Vaccines Certificate for Erasmus+ students_English**
- **Professional Insurance document to fill in and send to** erasmusifmkvichy@kine-vichy.fr

At the end of the internship, students are asked to write a paper on their experience for the VICHY IFMK Website.
